"Children's Dental Health Month" is observed

On January 31, Governor Dick Thornburgh signed a proclamation designating the month of February as "Children's Dental Health Month" in Pennsylvania. This is the fourth year that a full month has been designated to promote the oral health care of children.

The governor's proclamation reads in part: "A vital goal of the Commonwealth's dental care community and our health officials is to educate our young people in proper dental habits during their formative years so that they can lead healthier and happier lives. It is important to teach our children about preventive care and the value of maintaining a sound daily dental regimen. Through special events in February, we hope that all parents and children will learn the importance of proper dental care."

Dr. Charles B. Brown, a Carbondale dentist said that the Lackawanna County Dental Society in conjunction with the Pennsylvania Dental Association will hold a Mail Day at the Viewmont Mall on Saturday, February 10, and then on February 12, "Sugarless Day" will be observed in the state.

Brown said the purpose of the Mail Day is to promote good dental health by showing children and their parents how to take better care of their teeth than in the past because of preventive treatment.

When I was a kid you would only go to the dentist if you had a toothache," he said. "Now children go to the dentist to get their teeth cleaned and for regular checkups."

Dr. Howard Wimmer, whose office is located at 28 N. Church St., said that Children's Dental Health Month will make the public aware of new breakthroughs in modern dentistry.

"I think it's a great idea," he said. "The public is unaware of some of the new techniques. Modern dentists do things differently and the old drill replaced."

Dr. Wimmer explained that recent discoveries in dentistry have made it possible to reconstruct teeth and make root canals a relatively simple procedure if done correctly.

He feels that Children's Dental Health Month can make children and adults aware of what's going on in dentistry today.
